

Introducing the...

NeuroSpa
The essence of Wellness

Ahhh! Stress Relief.....
In only 30 minutes, your
body, mind & spirit can
experience the equivalent of
a full days rest!

Exclusive to Calm 'n Scents®

It is a well known researched fact, that stress is the major cause of illness & disease, including diabetes, heart attack & stroke. Stress causes dysregulation of our hormones which in turn causes dysregulation of our organs & systems.

Our bodies have an innate intelligence that knows how to heal & regulate itself if given the proper environment - a stress free body.

The NeuroSpa was developed after many years of research on the positive impacts of music on the human brain and body. It is considered a neuromuscular massage via multi-frequency acoustic vibration, synchronized with conventional music. It is indeed the first therapeutic device that can bring about complete mental and physical harmony. The NeuroSpa experience is a symphony of pleasant, soothing sensations, that deeply relaxes the nervous system. In only 30 minutes, the equivalent of a full day's rest can be attained with the NeuroSpa.

Your initial visit should be a 45 minute session on the NeuroSpa in order to benefit substantially from further sessions. Subsequent sessions can be 30 minutes or more.

One of the quickest roads to stress relief & good health, is the NeuroSpa.
Book your session today! Calm 'n Scents® 519-332-2929
