## APPLICATIONS OF COLOUR THERAPY PRiSMA GLASSES

We receive 90% of our information through our eyes. Therefore, when we wear certain colours of lenses in eyewear, we are able to see and feel the world through that colour. **Via our eyes we feed our body the attributes and qualities of a colours' vibration—colour nutrition on a cellular level.** Simply by wearing the COLOUR ENERGY Glasses, the distribution of energy and harmony in the body is influenced (directly by that colour) since the colour acts through the eye directly upon our body's physical, mental and emotional system. Helping us to improve our overall state of being!

### WHY BUY PRiSMA GLASSES?

PRiSMA COLOUR ENERGY Glasses are specially developed for colour therapy treatment and are used in medical applications. The colours correspond with the most intensive colours of the spectrum and therefore the purity of the colours are ideal for their healing attributes. **PRiSMA glasses are also 100% UVA & UVB coated and thus can be worn as sunglasses.** No other colour therapy glasses on the market can even compare to their purity of quality!

### COLOUR DESCRIPTIONS
